

Carbides for Any Procedure & Q-Finishers®

Are you looking for the right carbide to work on composites or prep a cavity or crown? If so, then KOMET USA has an extensive range of carbide burs to expand and enhance your rotary-instrument armamentarium.

KOMET USA's award-winning, tungsten-carbide Q-Finishers® efficiently work on composites with optimal results, and their innovative tooth configuration permits a two-step finishing procedure for composite restorations. Many of KOMET's carbide finishing instruments feature smooth, non-cutting tips, allowing a gentle finish without causing gingival trauma or damage. KOMET's innovative carbides also can be employed for occlusal, labial, and interproximal finishing—permitting precise removal of just the right amount of material.

Q-Finishers®

Retail: \$9.95 each • \$49.75 5-pack

"KOMET USA's Q-Finishers® are fantastic, multi-functional burs that I use in both anterior and posterior quadrants. Using high-quality, precision burs results in reduced chairtime and costs. Q-Finishers® are the perfect choice because they completely eliminate at least one finishing step, achieving finely polished restorations quickly and efficiently."
